

Operator Troubleshooting Scenarios

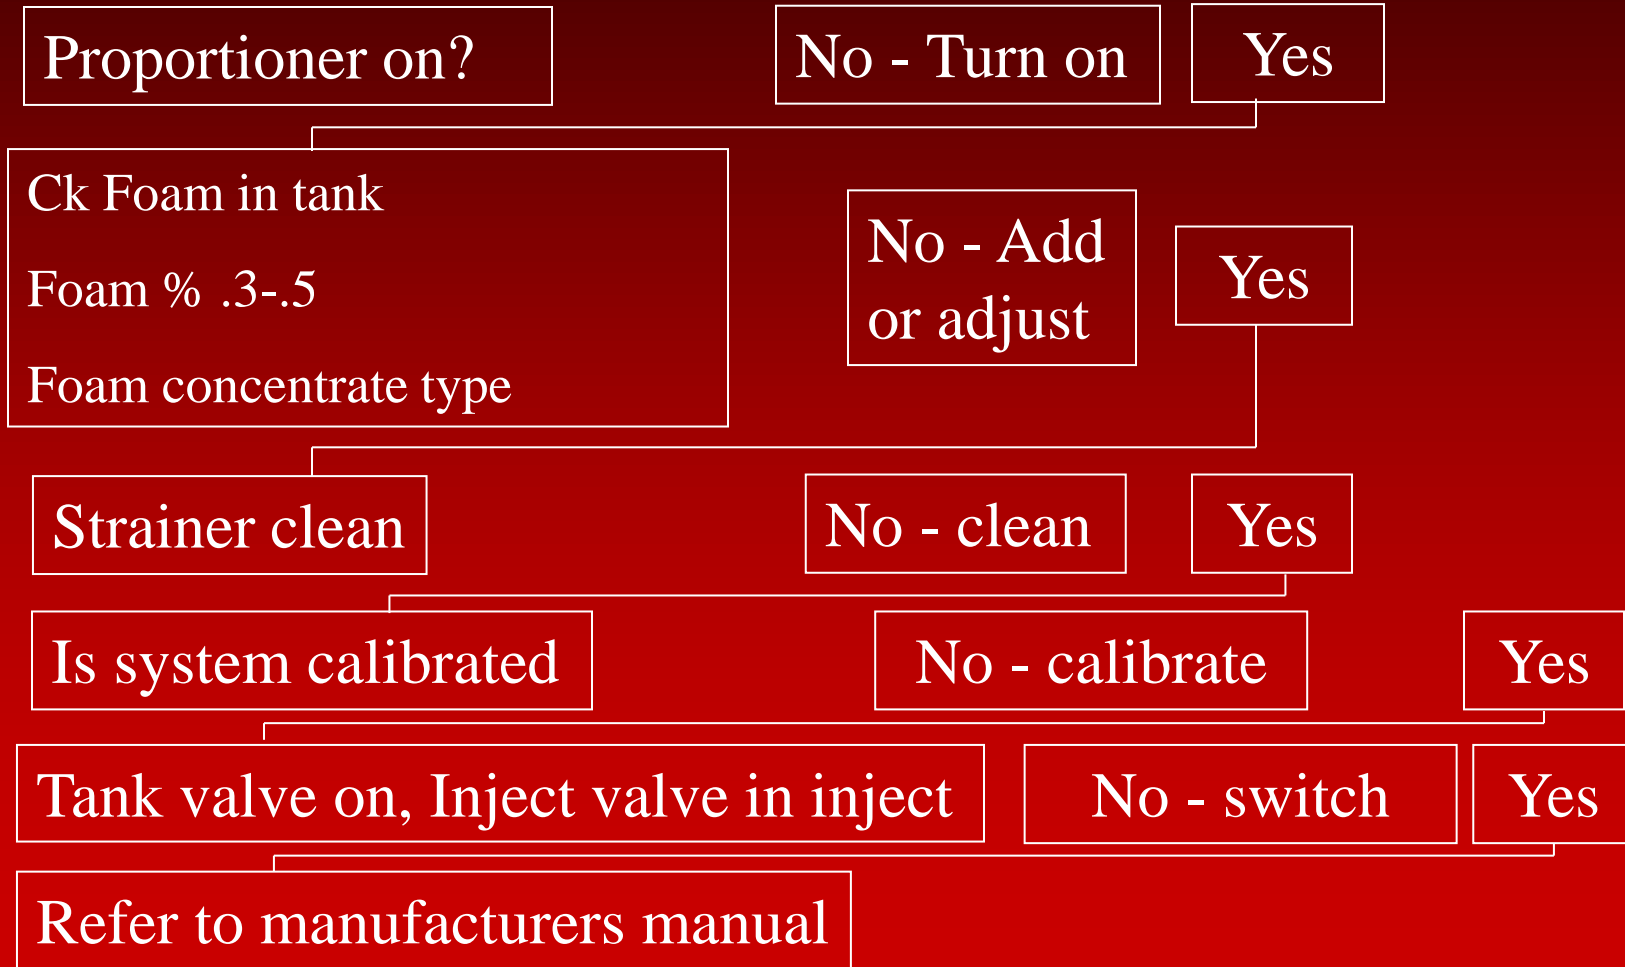

Operator Factors

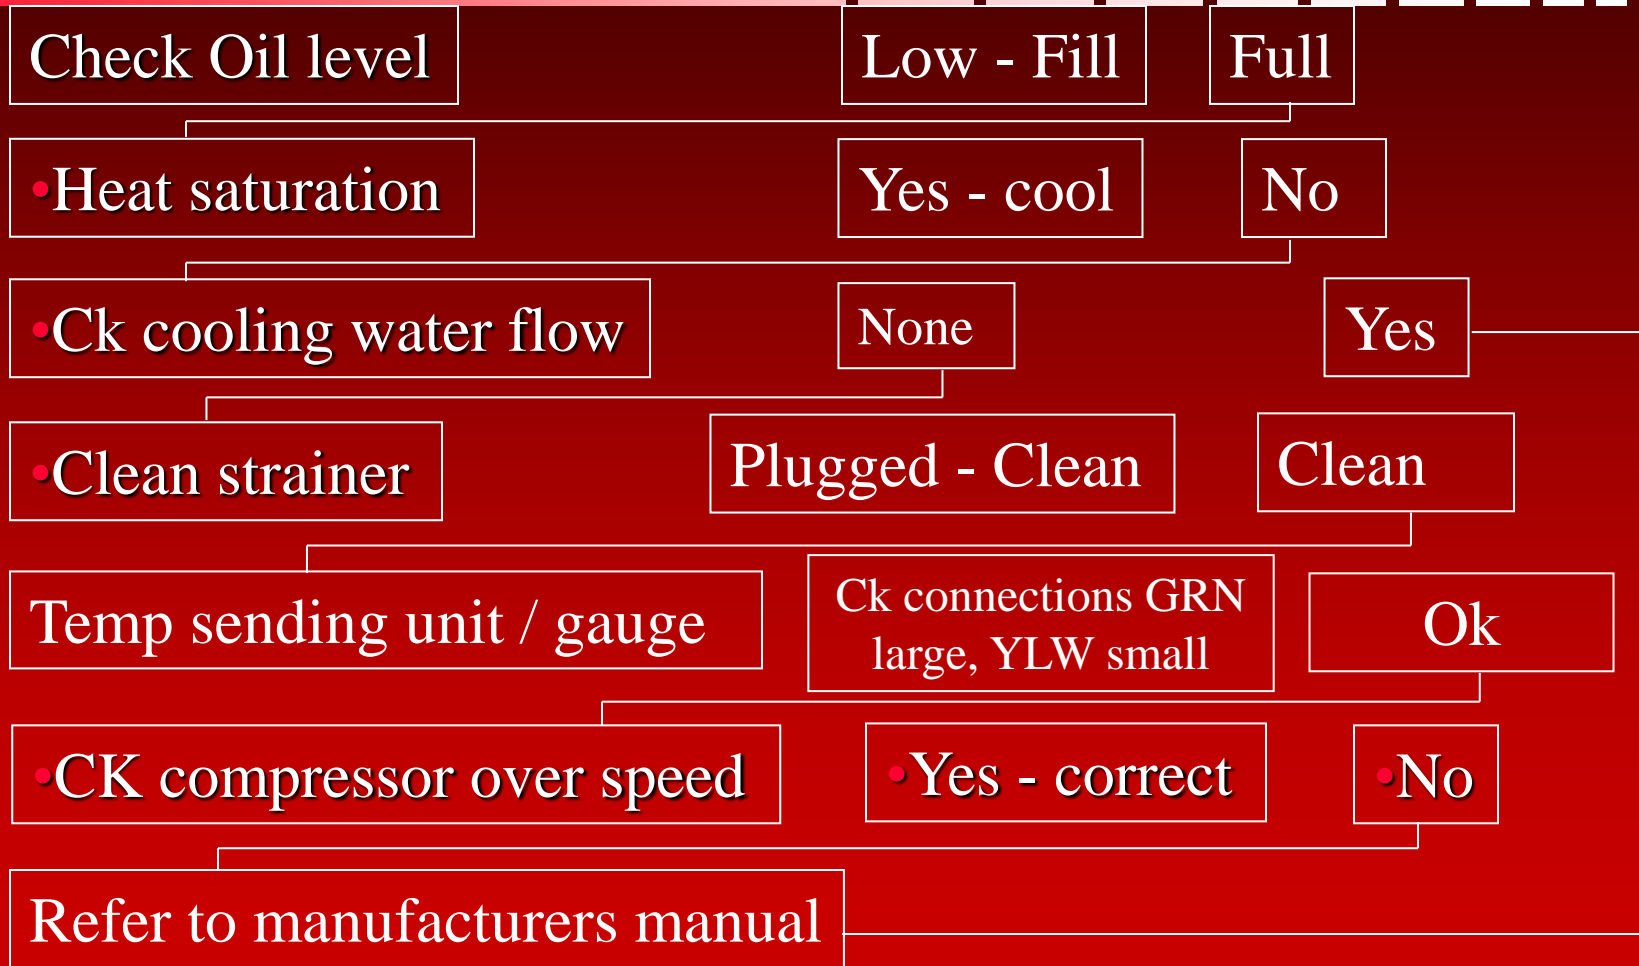

- Concentrate
- Hose
- Nozzels

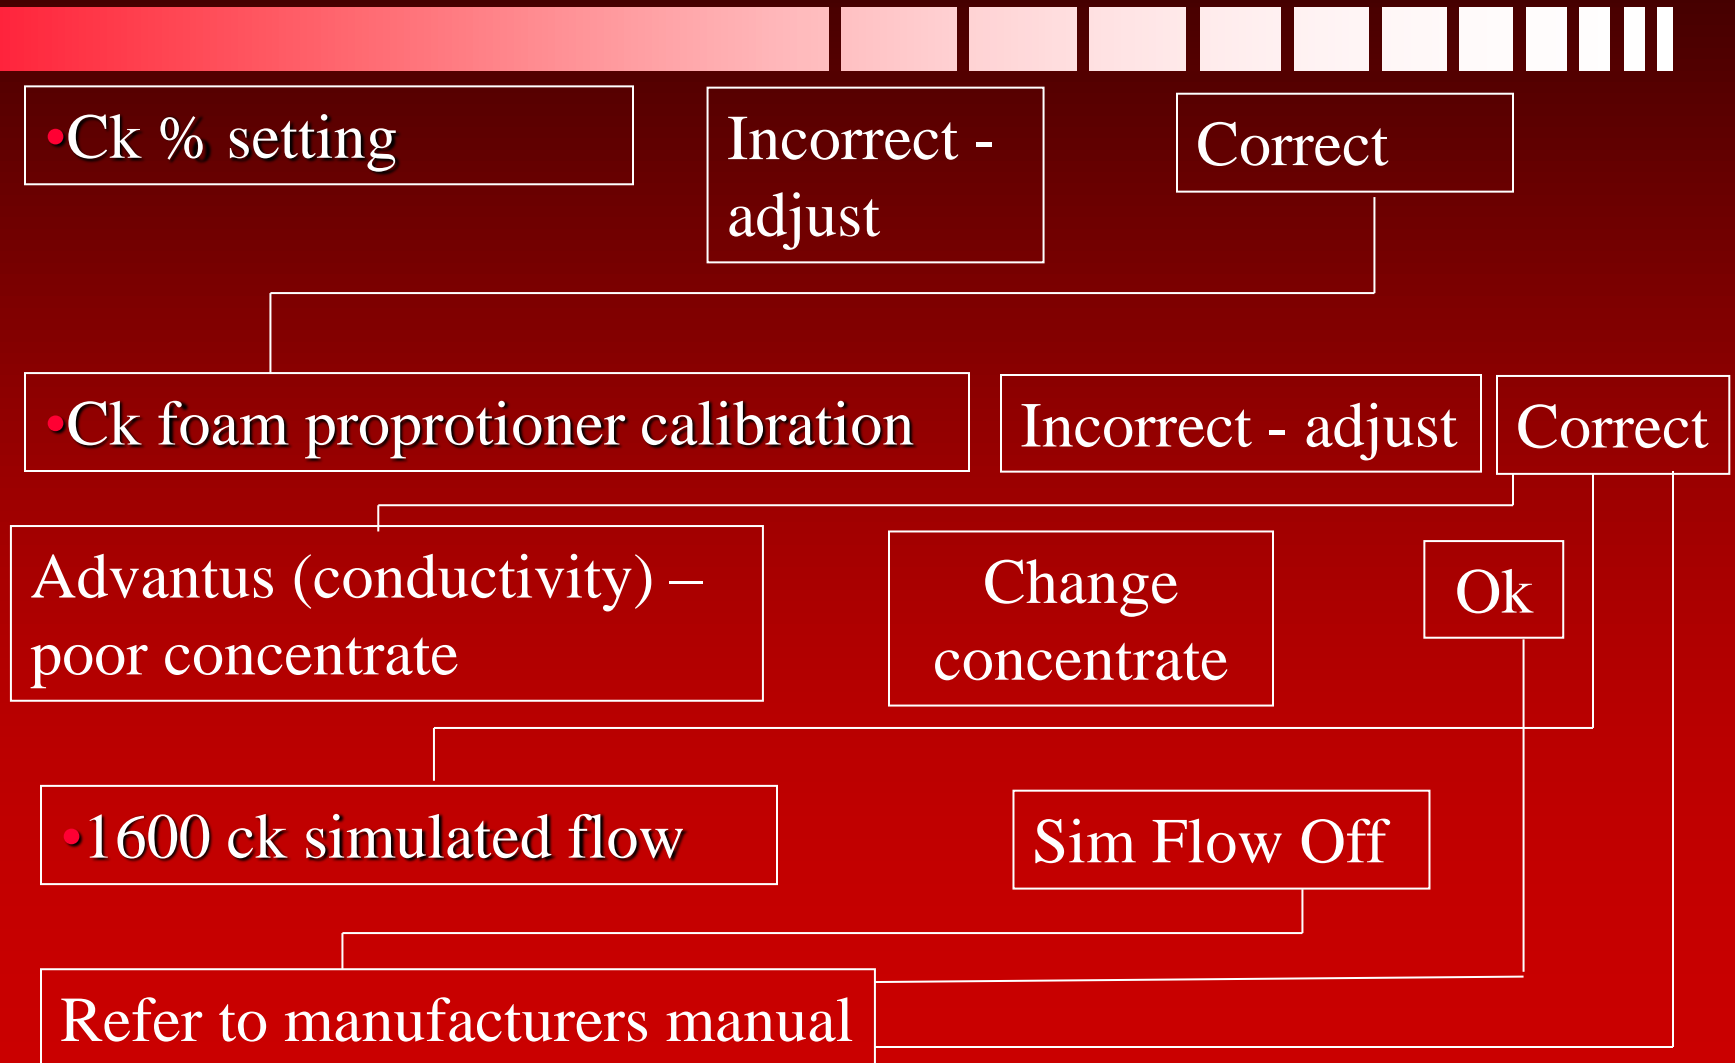

Hose Shakes – Slug Flow

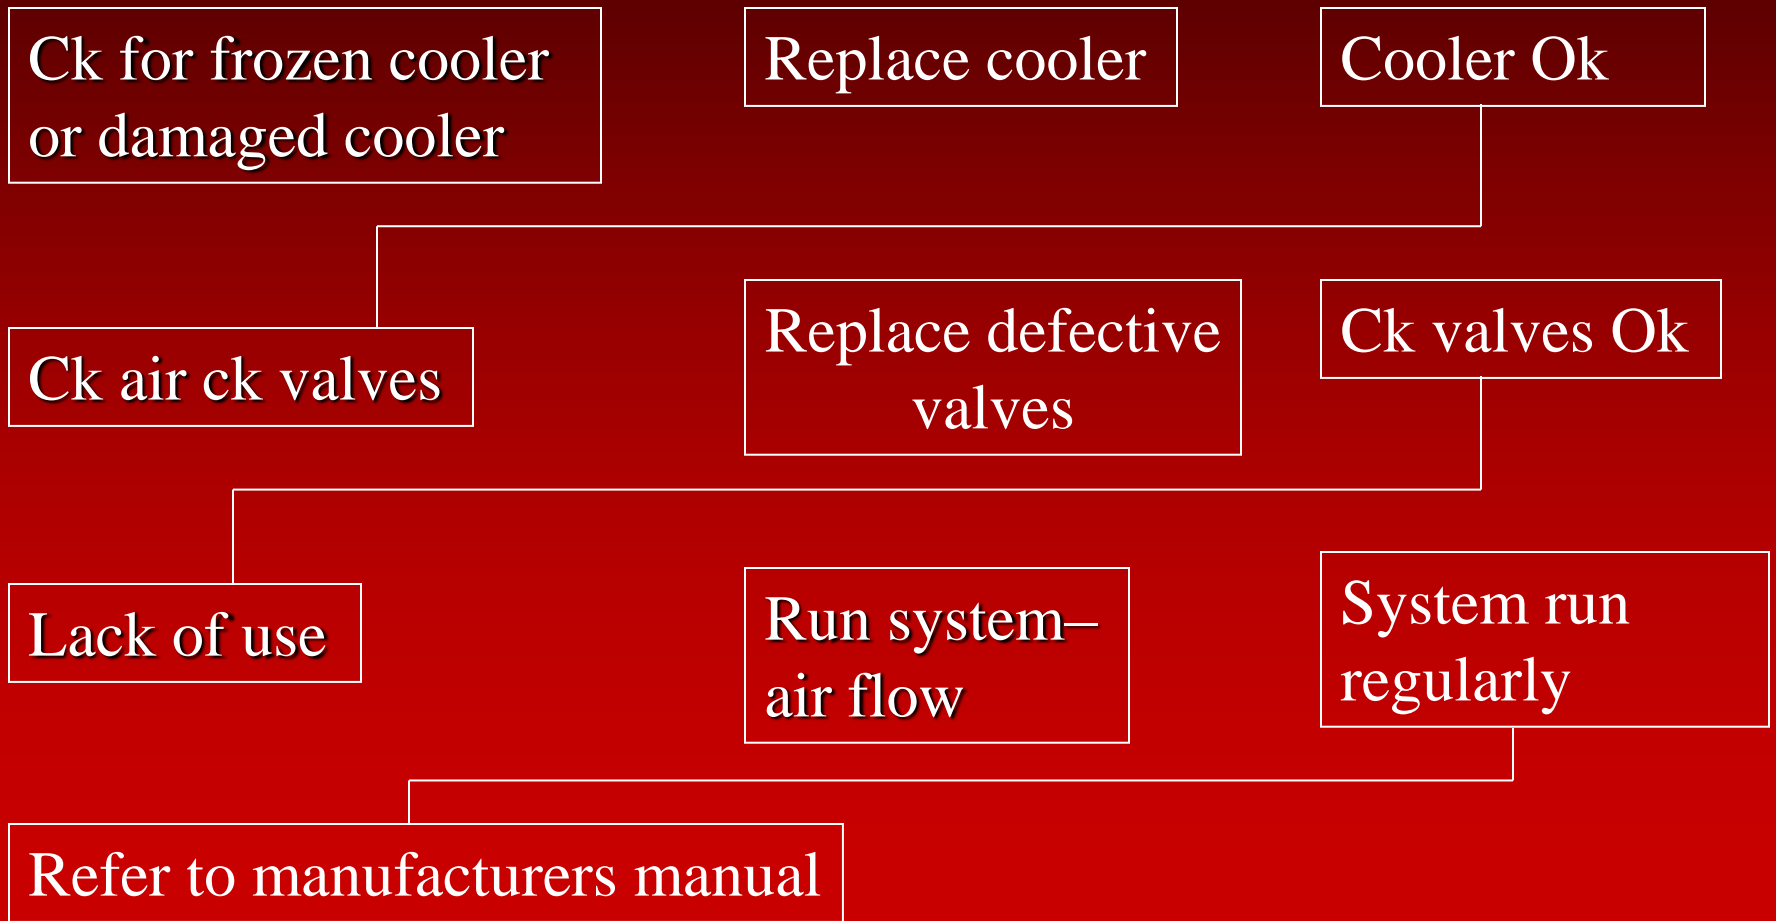

Compressor overheats

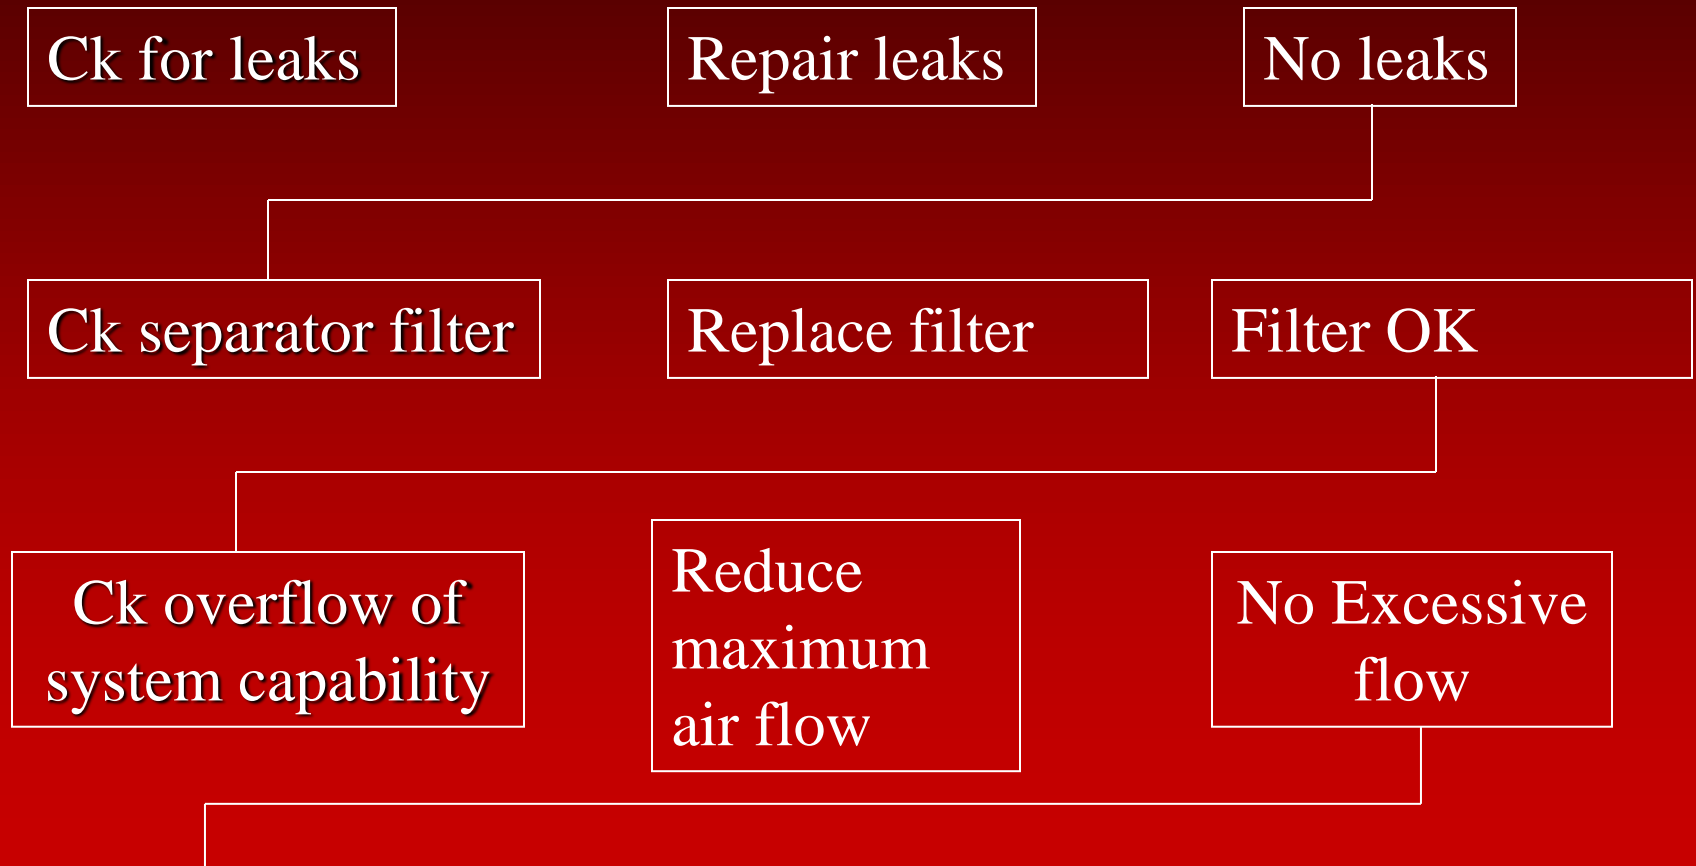

Uses excessive amounts of concentrate

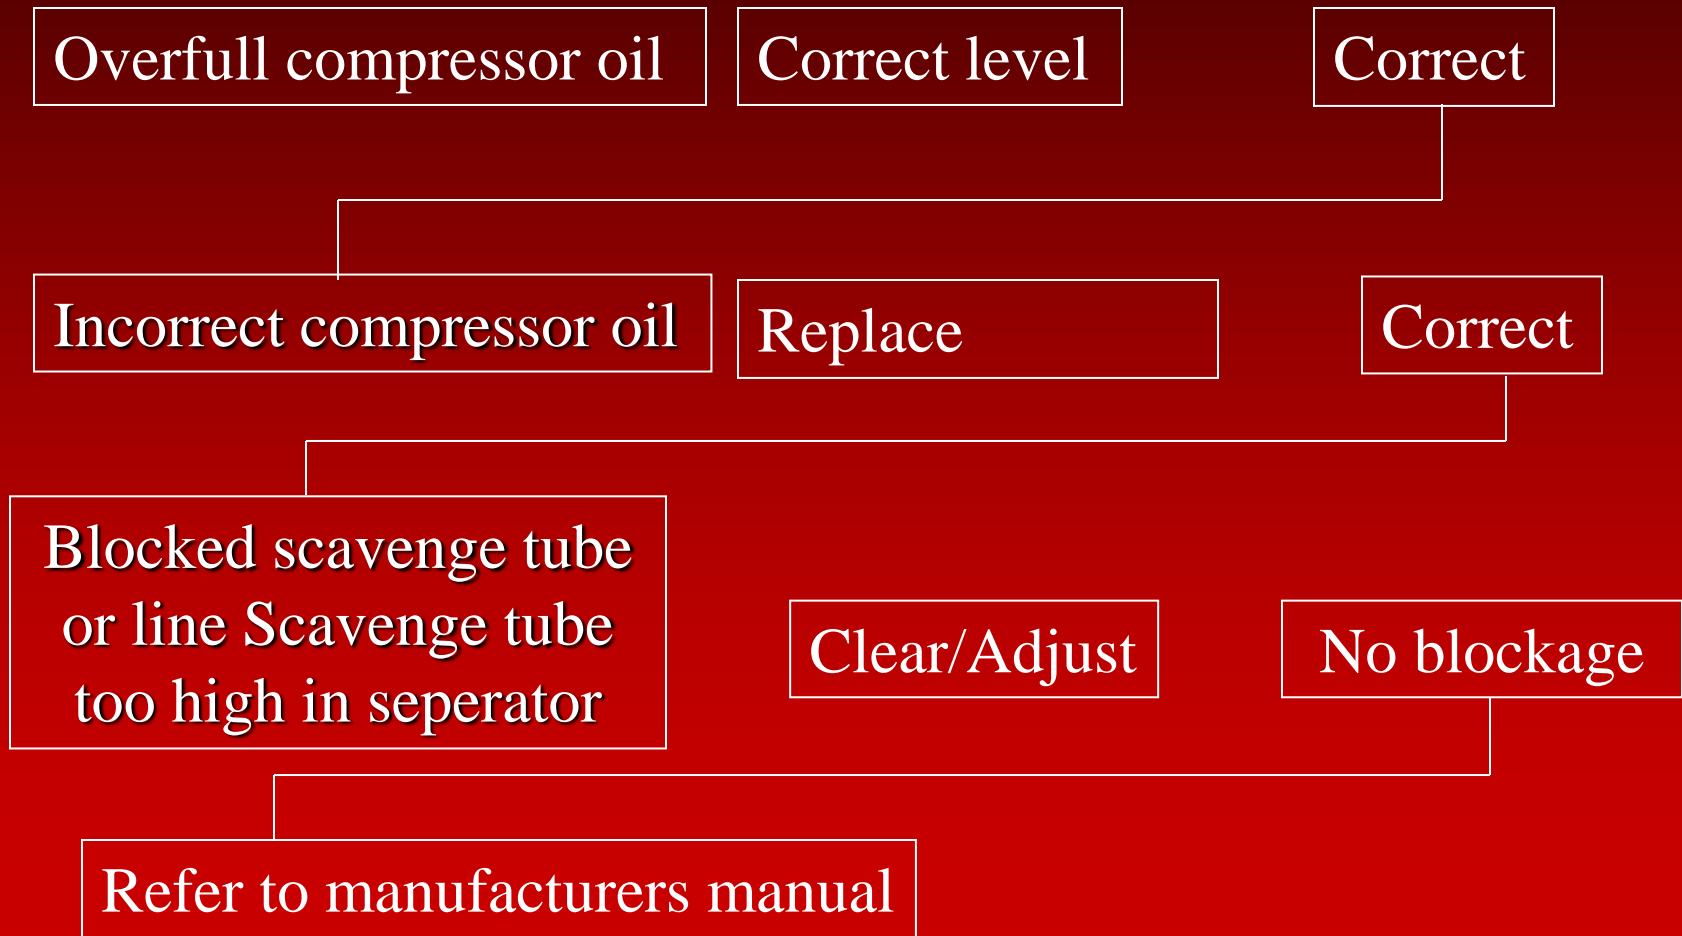

Water in compressor oil

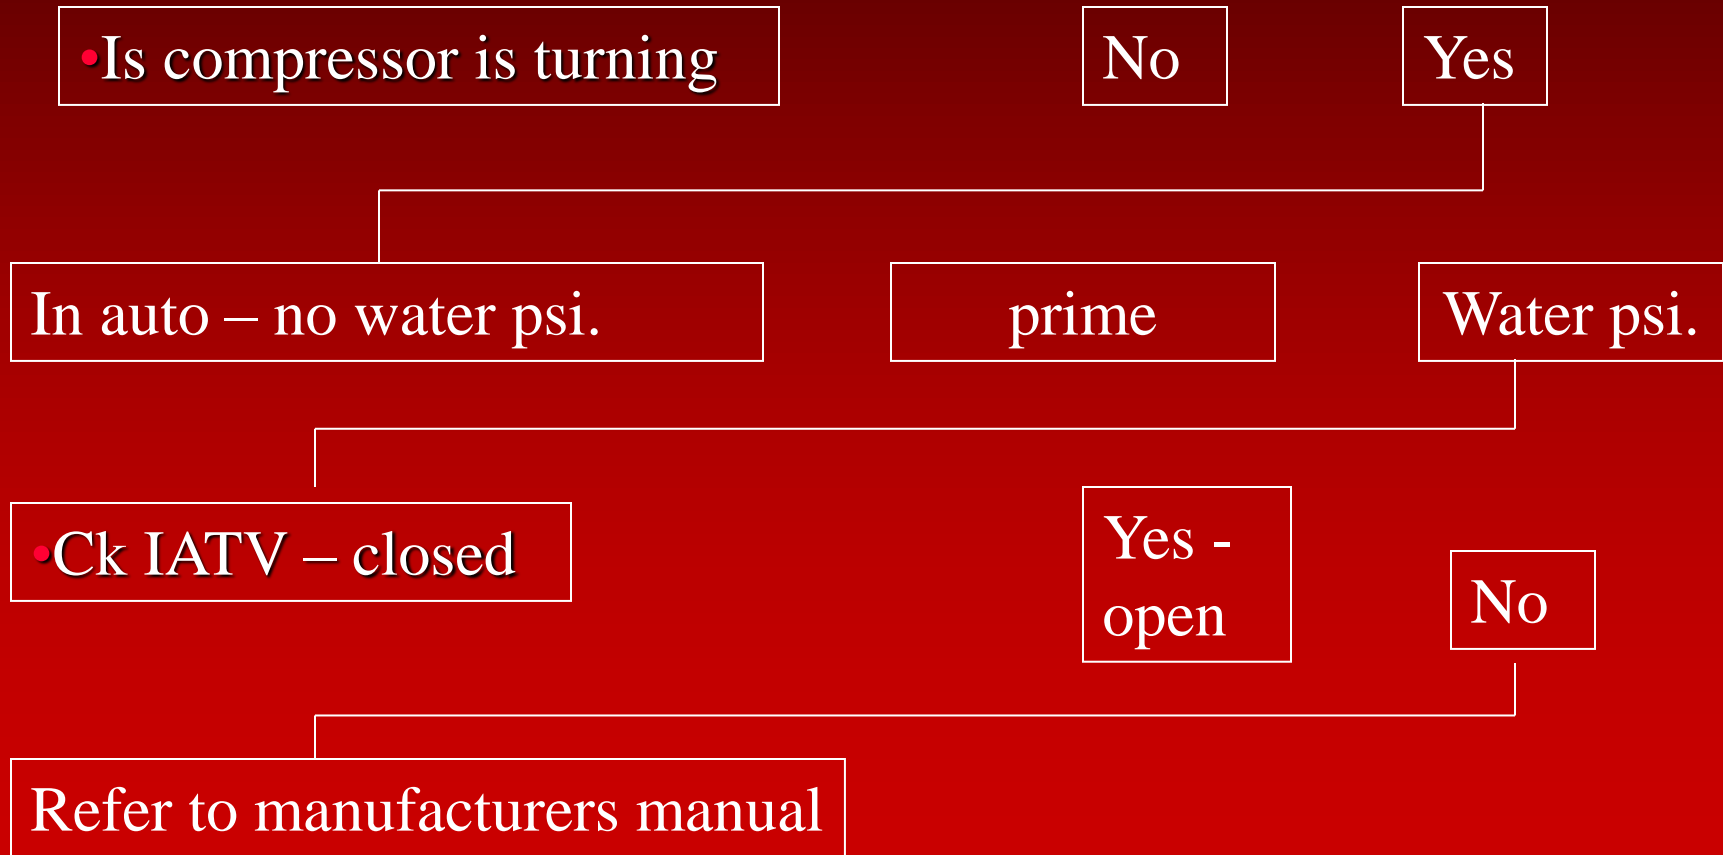

Excessive oil consumption

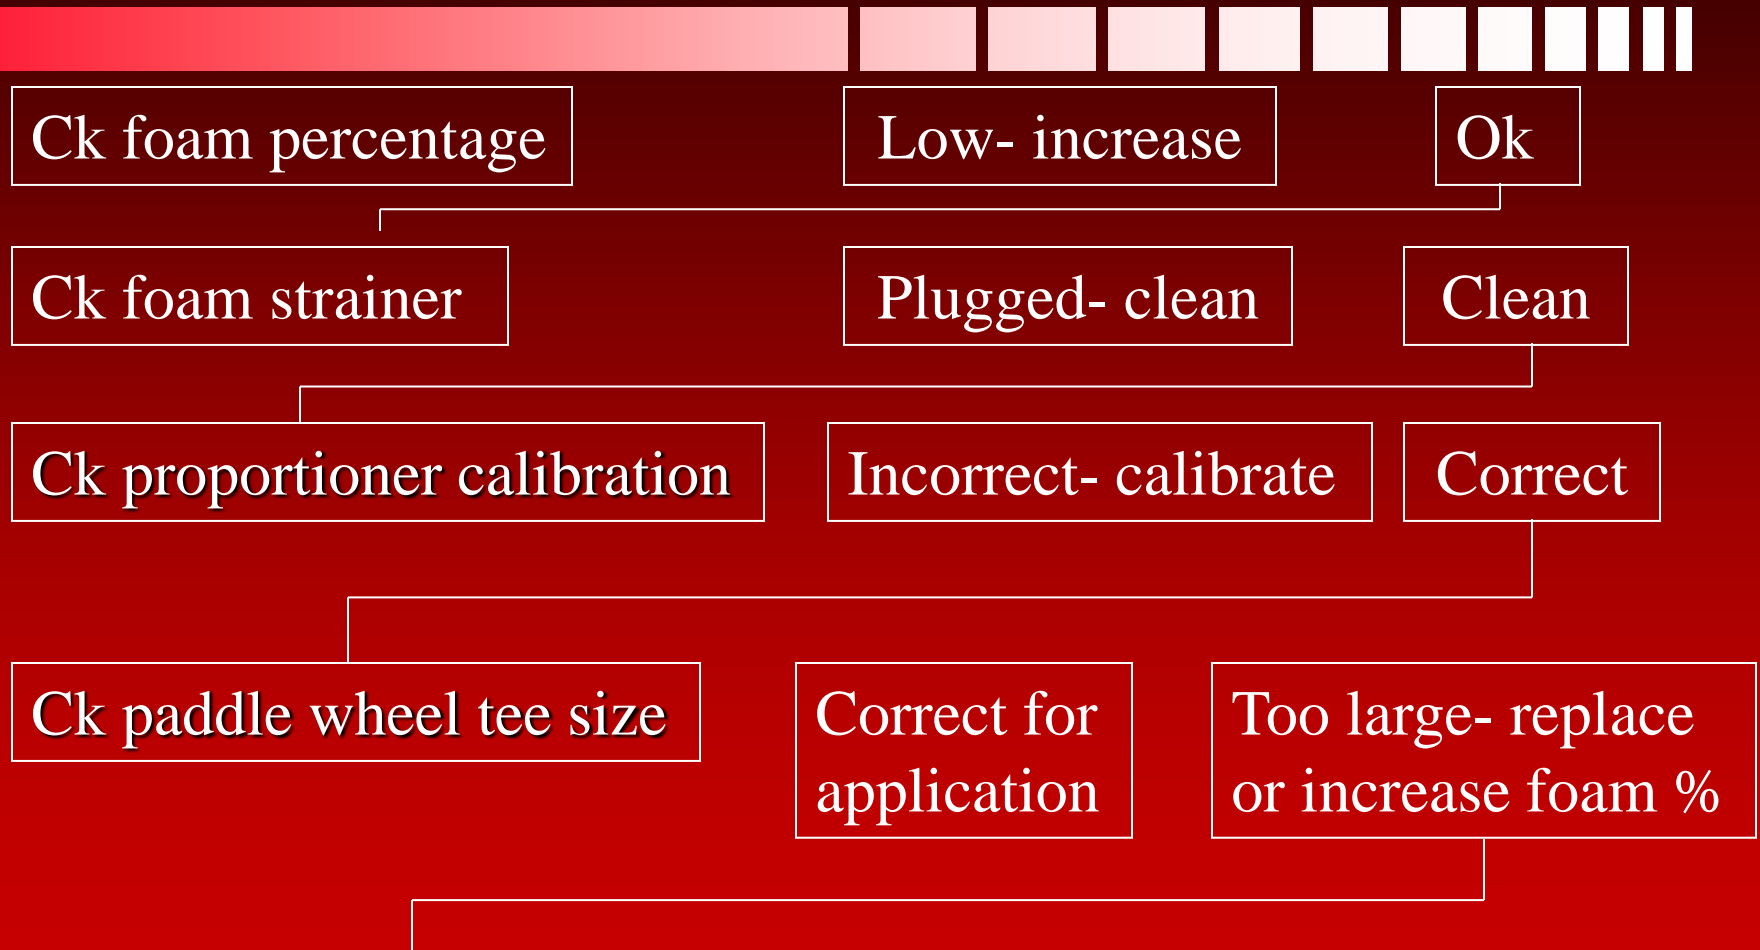

Excessive oil consumption

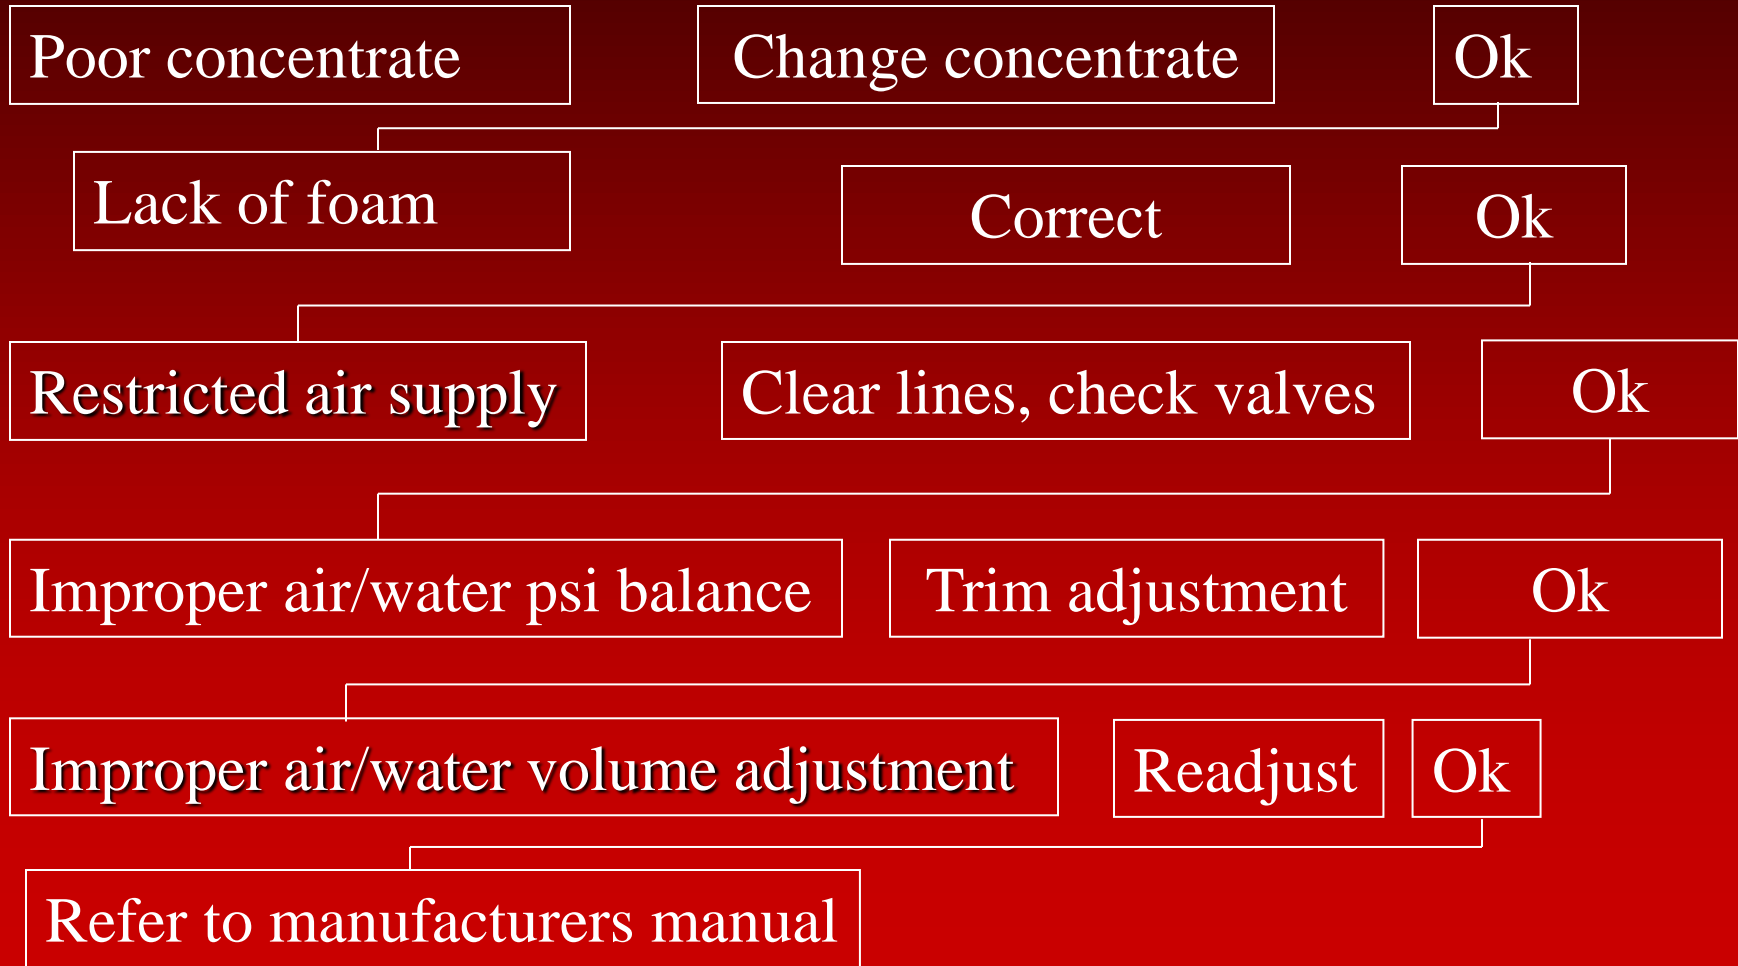

Compressor won't build air psi

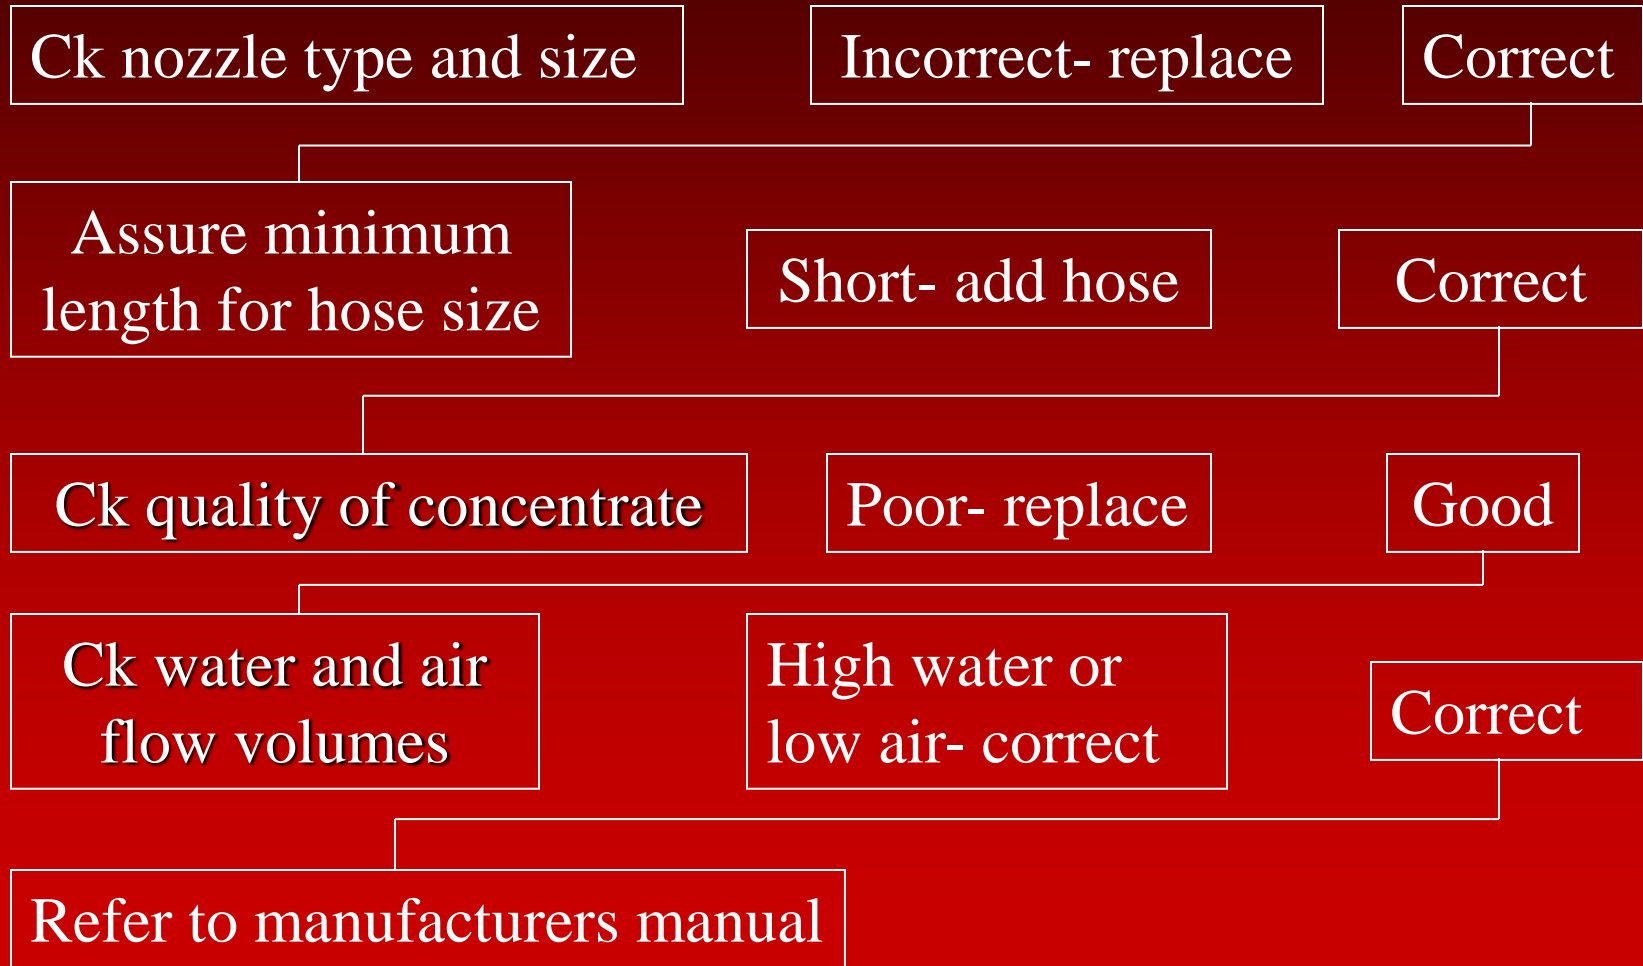

Poor foam quality during low flows

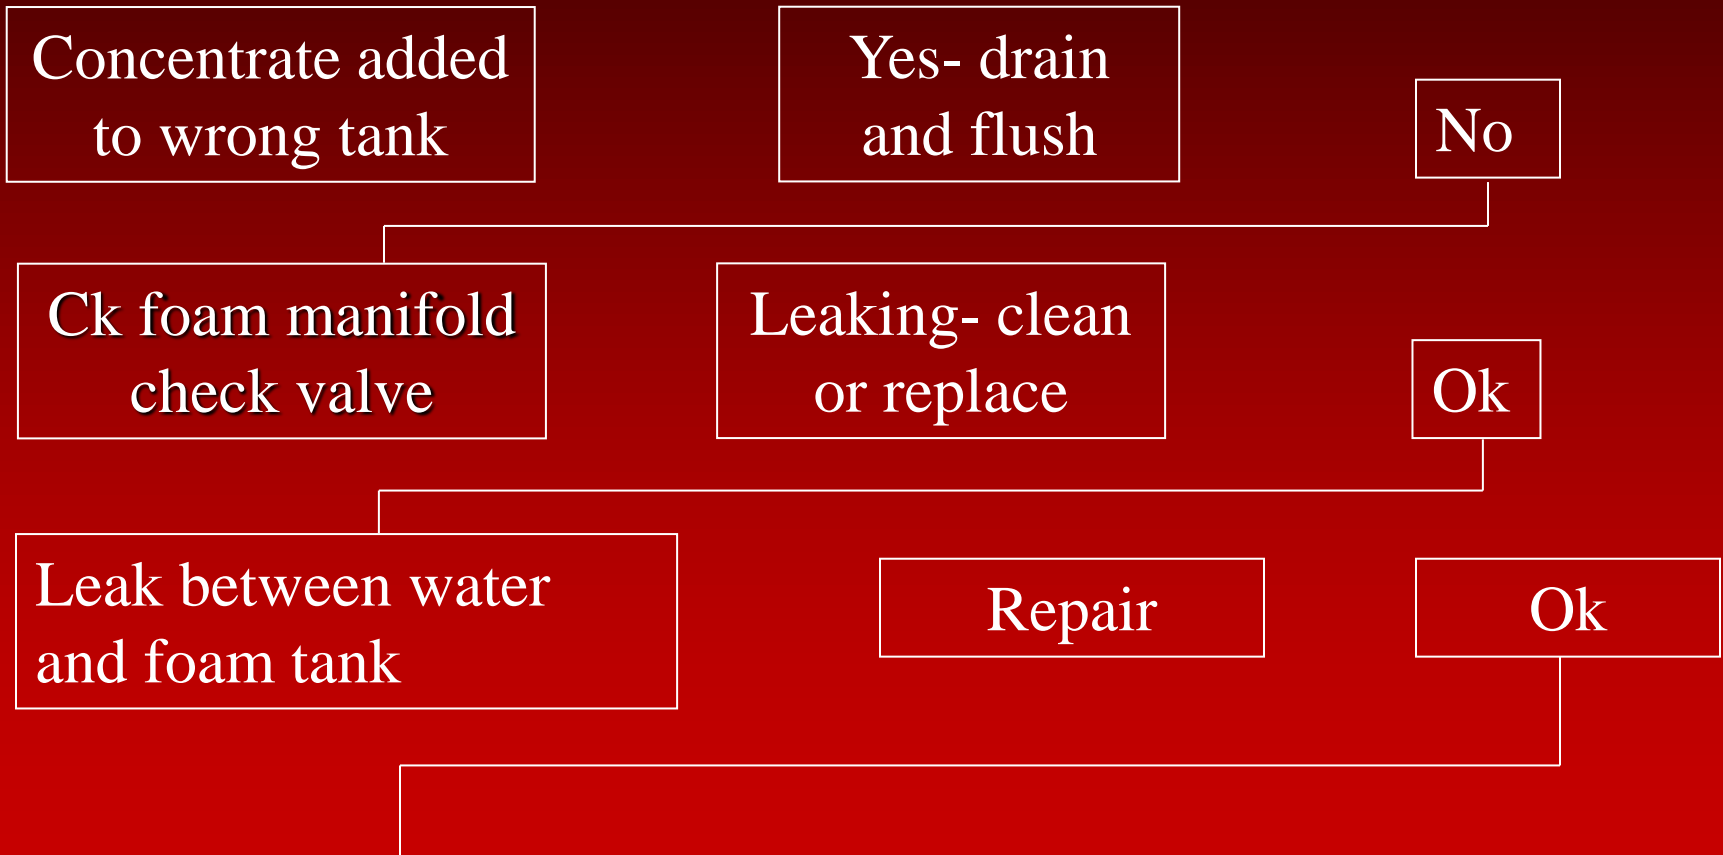

Poor foam quality during low flows

Can't make foam dry

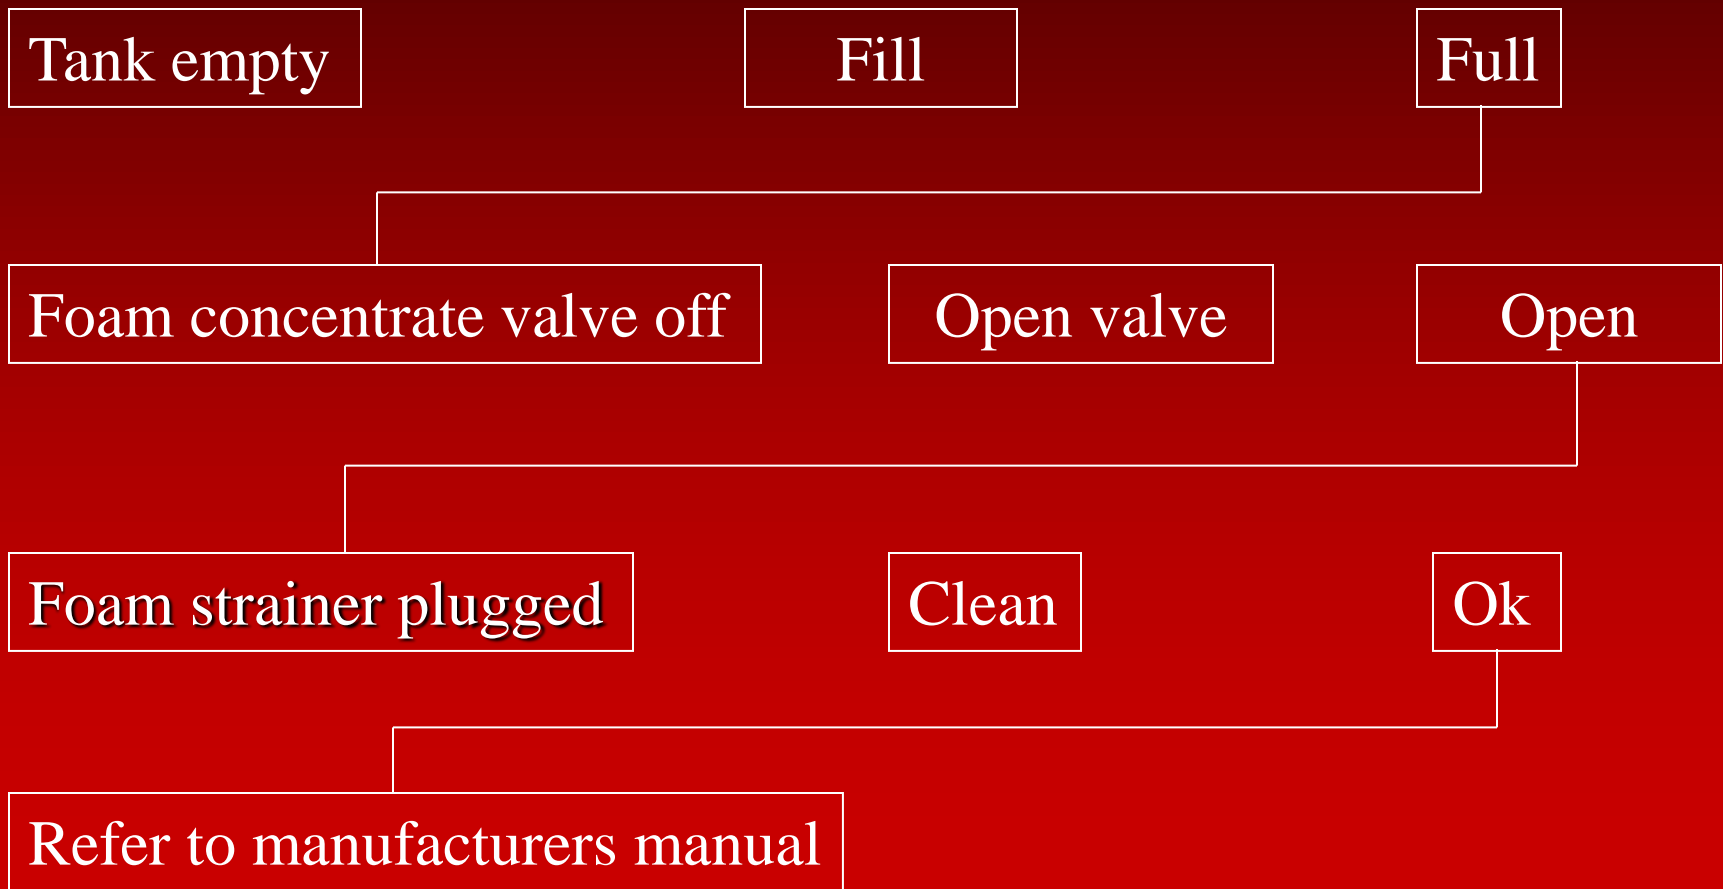

Foam in the water tank

Foam in the water tank

Proportioner runs but no foam in line

No digital display on proportioner
